

Sol Robinson

Seattle, WA 98109 | 425-615-5180 | srobins6@gmail.com | [linkedin.com/in/solrobinson](https://www.linkedin.com/in/solrobinson)

Software Engineer

Front-end software developer with full-stack experience, collaborating with colleagues and clients to launch progressive programs with expanded functionality that elevate the user experience. Design user interfaces (UIs), execute testing protocols, and troubleshoot issues, managing release schedules for on-time hand-off to production.

Core Competencies:

Web Development | APIs | Database Configuration | Data Structures | Microservices | Problem-Solving
User Interface (UI) Design | Testing & Quality Assurance (QA) | Team Collaboration | Software Release

Technologies:

Programming Languages: HTML, CSS, JavaScript, C++, C#, Python, PHP

Open-Source Web Frameworks: Blazor, ASP.NET, Laravel

Cloud Computing: Azure

IDE: Visual Studio

Professional Experience

MICROSOFT, Redmond, WA

Software Engineer 2

09/2021 – 04/2023

Software Engineer 1

03/2018 – 09/2021

Collaborated to launch new business and user experience for Xbox gaming on mobile devices using existing hardware/software to build and manage net-new functionality, driving 0-1 product from idea to reality.

- Wrote C++ functions on Xbox hardware to enable API-based services to perform original local controller functions via current/future API calls.
- Diagnosed and resolved credentials reset issue causing restart connection failure resulting from legacy Xbox infrastructure designed exclusively for local game play.
 - Examined system IDs in boot vs. in static online mode and identified discrepancies that blocked communication with central server.
 - Designed system embedded in core of Xbox operating system to preserve credentials through reboot while maintaining security.

Developed programs to expand functionality on cloud gaming system and served as team UX lead.

- Coded C# microservices, such as client/user configuration running at start of each gaming app session to enable app features.
- Developed web UI using HTML, JavaScript, ASP.NET, and Blazor, allowing Xbox product managers, streaming team, and cross-functional partners access to control services and manage configurations.
- Implemented UI designs and testing protocols to align with company best practices for internal web tools.
- Managed release schedule, from local to production environments, testing for standardized QA requirements in each step, integrating feedback, and fixing errors.
- Implemented web UI for critical growth initiatives for the new cloud gaming platform, including launching regional setting functionality that enabled scalability to 21 countries at launch with individual features.
- Created a new version of web UI to accommodate a more complex program with expanded progress tracking and error handling, which enabled growth to 150 games at launch and future scalability.

INDEPENDENT CONTRACTOR, Urbana, IL

Freelance Software Engineer

01/2017 – 02/2018

- Created custom scripting web app to automate ecommerce online A/B marketing tests for online ecommerce brand to algorithmically select optimal test variables across ads, email, and website
- Refactored backend by learning and implementing newest version of Laravel to create web and Android full stack apps for local delivery company, allowing the service to scale beyond initial iOS app.

- Built Laravel-based, tinder-style ecommerce swiping application for proof-of-concept startup exploring swiping-style shopping for engagement rings. Navigated extremely ambiguous environment with only conceptual requirements to create technical plans and implement.

Professional Experience (continued)

NATIONAL CENTER FOR SUPERCOMPUTING APPLICATIONS, UNIVERSITY OF ILLINOIS, Urbana, IL

Web Developer

06/2016 – 02/2018

- Collaborated with team members to build series of automated Google Chart visualizations for Blue Waters supercomputer diagnostic monitoring service using Python, to provide simplified, visual feedback to scientist users and system administrators to facilitate job scheduling and launch planning.
- Converted manual reports to automated system.

Prior roles at University of Illinois:

Web Developer, Robinson Lab for Honey Bee Research

08/2010 – 02/2018

Software Engineering Intern

04/2014 – 10/2015

Research Assistant

06/2010 – 08/2010

Education

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN, Urbana, IL

Bachelor of Science, Computer Science

2017
